

Table of Contents

About the Author	vii
Foreword	ix
Preface	xiii

Chapter 1: Abuse Survivors in the Health Care System

The Health of Adult Survivors	1-1
Patterns of Health Care Use	1-2
Doctors' Visits	1-2
The Impact of Severity	1-2
Symptoms, Surgery, and Disability	1-3
Increased Health Care Costs	1-4
Depression	1-4
Posttraumatic Stress Disorder	1-5
Pain	1-5
Why Child Abuse Makes People Sick	1-6

Chapter 2: Physiological Pathways

The Brain and Nervous System	2-1
Brain 101	2-2
Brainstem Nuclei	2-2
The Stress Response	2-2
Sensory Intake and Interpretation of the Environment	2-3
Generation of Emotions Based on the Appraisal Processes	2-3
Initiation of Autonomic and Endocrine Responses	2-4
Autonomic and Endocrine Outflow	2-4
Neuronal Plasticity	2-4
Sensitization	2-5
Changes in the HPA Axis	2-6
Evidence for HPA Alterations and Sensitization	2-7
Animal Studies	2-7
Studies of Infants	2-7
Studies of Children	2-7
Summary	2-8

Chapter 3: Behavioral Pathways

Substance Abuse	3-2
Representative Sample of Adults	3-2
Samples From Primary Care Medical Practices	3-3

Samples From Treatment Programs	3-3
Samples With Children or Teens	3-3
Other Clinical Populations	3-4
Prospective Designs	3-4
Possible Explanations for Substance Abuse in Adult	
Survivors	3-5
Psychosocial Explanations	3-5
Biological Vulnerability	3-5
How Substance Abuse Affects Health	3-6
Smoking	3-6
Why Abuse Survivors Smoke	3-7
How Smoking Affects Health	3-7
Obesity and Eating Disorders	3-8
Obesity	3-8
Eating Disorders	3-8
Theories for Eating Disorders in Abuse Survivors	3-10
How Obesity and Eating Disorders Impact Health	3-10
Suicide	3-10
Relationship Between Abuse and Suicide	3-11
The Health Effects of Suicide Attempts	3-12
High-Risk Sexual Behavior	3-12
High-Risk Sexual Activity Among Special Populations	3-14
Theories Explaining High-Risk Sexual Behavior	3-14
Cognitive Aspects of High-Risk Sex	3-14
Social Learning Theory	3-16
Health Effects of High-Risk Sexual Activity	3-16
High-Risk Behaviors in Combination	3-17
Health-Promoting Behaviors	3-17
Sleep	3-18
Possible Mechanisms for Sleep Disturbances	3-18
Perfectionism and Parental Criticism	3-18
Anxiety	3-19
Depression	3-19
PTSD	3-19
How Sleep Affects Health	3-20
Summary	3-20
Chapter 4: Cognitive Pathways I—Beliefs About Self	
Shame and Self-Blame	4-2
Shame	4-2

Self-Blame	4-3
Studies With Teens and College Students	4-3
Studies With Adults	4-3
Health Effects of Shame and Self-Blame	4-4
Attributional Style	4-5
Impact of Abuse on Attributional Style	4-6
How Attributional Style Influences Health	4-6
Health Perception	4-7
Health Effects of Health Perception	4-8
Health Locus of Control	4-9
Self-Esteem and Self-Efficacy	4-9
Self-Esteem Influenced by Childhood Abuse	4-10
Self Efficacy Influenced by Childhood Abuse	4-10
Health Effects of Self-Esteem/Self-Efficacy	4-11
Adaptation to Disability	4-11
Compliance With Treatment	4-12
Health Behaviors	4-13
Self-Efficacy and Parenting	4-13
Summary	4-13

Chapter 5: Cognitive Pathways II—Cognitions About Others

Internal Working Model	5-1
Mistrust and Hostility	5-2
Mistrust	5-2
Hostility	5-2
Health Effects of Mistrust and Hostility	5-3
Rejection Sensitivity	5-4
Rejection Sensitivity and Current Relationships	5-4
Rejection Sensitivity and Health	5-5
Dependency	5-6
Religiosity	5-7
Impact of Past Abuse on Religious Faith	5-7
Religion and Health	5-8
How Religion Can Positively Influence Health	5-8
How Religion Can Negatively Influence Health:	
Anger at God	5-10
Forgiveness	5-10
Hope	5-11
Impact of Abuse in Hope	5-11
Hope and Health	5-12

Summary	5-12
---------------	------

Chapter 6: Social Pathways I—Social Networks, Support, and Relationships

Attachment Theory Revisited	6-2
Insecure Attachments	6-2
Abuse as Predictor of Attachment Style	6-2
Health Effects of Insecure Attachment	6-3
Quality of Current Primary Intimate Relationship	6-3
Divorce	6-4
Social Isolation	6-4
Impact of Relationships on Health	6-4
Social Support Buffers Stress	6-5
Marriage, Marital Strife, and Health	6-6
Social Isolation and Health	6-7
Childhood Abuse and Interpersonal Style	6-7
Dysfunctional Interpersonal Styles	6-8
Relationship of Interpersonal Style to Health	6-8
Unmitigated Communion	6-8
Caretaking	6-9
Attachment Style	6-9
Relationships	6-9
Why Social Support Is Sometimes Stressful	6-10
Summary	6-10

Chapter 7: Social Pathways II—Poverty, Homelessness, and Revictimization

Socioeconomic Status	7-1
Difficulties in School	7-2
Learning Difficulties in Adults	7-3
SES and Health	7-4
Unhealthy Behavior	7-4
Psychosocial and Psychobiological Factors	7-4
Homelessness	7-5
History of Adverse Experiences	7-5
Teens and Homelessness	7-7
Health Implications of Homelessness	7-7
Revictimization	7-8
During Childhood	7-8
Of Young Adults and College Students	7-9
Of Adults	7-9

Community Samples	7-9
Clinical Samples	7-11
Family Dysfunction Increases Risk	7-11
Revictimization in Ethnic-Minority Populations	7-12
Theories of Revictimization	7-12
Revictimization and Health	7-13
Summary	7-14

Chapter 8: Emotional Pathways—Posttraumatic Stress Disorder

Depression and Abuse Survivors	8-2
Prevalence	8-2
Co-Occurring Depression and Substance Abuse	8-3
Is Child Sexual Abuse Uniquely Harmful?	8-3
The Biology of Depression	8-4
Sensitization and Depression	8-4
Depression and HPA Alterations	8-5
Cholinergic Pathways in Depression	8-6
Depression and Cytokine Activity	8-6
How Depression Influences Health	8-6
Depression and Cardiovascular Health	8-7
Depression and Immune Function	8-7
Depression and Health Behaviors	8-8
Depression and Increased Vulnerability	8-8
Posttraumatic Stress Disorder	8-9
The Biology of PTSD	8-10
Dysregulation of Stress Response	8-10
Effects of PTSD on the Brain	8-11
How PTSD Affects Health	8-12
Mechanisms by Which PTSD Influences Health	8-12
PTSD and Comorbidity	8-13
PTSD and Reactivity	8-13
PTSD and Sleep Quality	8-14
PTSD and Health in Aging Trauma Survivors	8-14
PTSD vs. Depression	8-15
Summary	8-15

Chapter 9: Individual Differences in the Expression of Symptoms

Timing of Abuse, Brain Maturation, and Appraisal of Events	9-1
Brain Maturation	9-2
Critical Periods of Brain Development	9-2
Sensitization Revisited	9-3

Appraisal	9-3
Characteristics of the Abuse	9-4
Identity of the Perpetrator	9-4
Severity of Abusive Acts	9-4
Duration and Force	9-5
Ethnic Group Differences in How Abuse Is Experienced	9-5
Sex of Subject and Symptomatology	9-6
Quality of the Family of Origin	9-7
Independent Effects of Abuse vs. Family Dysfunction	9-7
Family Dysfunction Compounds Effects of Abuse	9-8
Family Dysfunction Also Increases the Risk of Abuse	9-9
Summary	9-9

Chapter 10: Chronic Pain in Abuse Survivors

The Enigma of Chronic Pain	10-2
Difficulties in Diagnosis and Treatment	10-2
Functional vs. Organic Conditions	10-2
The Pain-Abuse Connection	10-3
Psychiatric Comorbidity in Pain Patients	10-3
Explanations for Psychiatric Diagnoses in Functional Illness	10-3
Chronic Pain vs. Somatization	10-4
Treatment Impact of Somatization	10-6
Neurological Mechanisms in Pain	10-6
Brain Structures in Pain	10-7
Changes in the Pain Threshold	10-7
Chronic Pain Syndromes in Adult Survivors of Childhood Abuse	10-8
Back Pain	10-8
Headaches	10-8
Pelvic Pain and Other Gynecological Conditions	10-10
Pelvic Pain	10-10
Other Gynecological Conditions	10-11
Fibromyalgia Syndrome	10-13
Effects of Past Abuse on Development of FMS	10-13
Pathophysiology of Fibromyalgia	10-14
Sleep Problems in Fibromyalgia	10-15
Irritable Bowel Syndrome	10-16
A Diagnosis of Exclusion Associated With a History of Abuse	10-16
Some Theories of Irritable Bowel Syndrome	10-18
What We Know About Pain and Abuse	10-20
Pain Syndromes Co-Occur	10-20

Pain Syndromes Have Commonalities	10-21
We Still Cannot Prove That Abuse Causes Chronic Pain	10-21
Summary	10-22

Chapter 11: Clinical Approaches to Abuse Survivors in Health Care Settings

When to Suspect Past Abuse	11-2
How to Inquire About Past Abuse	11-3
Routine Screening	11-3
Clinician Concerns When Screening	11-4
Why Abuse Survivors May Deny Abuse	11-4
Trust Issues	11-4
Possible Amnesia	11-5
Handling Abuse History When Patients Share It	11-5
Charting Abuse Information	11-6
Maintaining Confidentiality	11-6
Assessing Current Patient Safety	11-6
Other Legal Obligations	11-7
Duty to Report	11-7
Duty to Warn	11-7
Treating Without Traumatizing: Approaches to Patients in Medical Settings	11-7
Using a Medical/Mental Health Team Approach to Care	11-9
Finding Clinicians in the Community	11-10
Identifying Comorbid Psychological Conditions	11-10
Use of Support Groups	11-11
Summary	11-11

Chapter 12: Clinical Management of Depression in Health Care Settings

Assessment of Patients for Depression	12-2
Depressive Symptoms	12-2
Diagnostic Criteria for Major Depression	12-2
Risk Factors for Depression	12-3
Past Depression	12-3
Current Stressors	12-4
Family History	12-4
Lack of Social Support	12-4
Psychiatric and Physical Comorbidity	12-4
Assessing Active Substance Abuse	12-4

Assessing Suicide Risk	12-5
Assessing the Need for Psychiatric Hospitalization	12-5
Treatment With Antidepressant Medications	12-6
Major Types of Antidepressants	12-6
Tricyclics	12-6
Selective Serotonin Reuptake Inhibitors	12-7
MAOIs	12-7
Phases of Depression Management With Medication	12-7
Acute Phase	12-8
Continuation Phase	12-8
Maintenance Phase	12-9
Antidepressants and Breastfeeding Mothers	12-9
Cognitive-Behavioral Therapy	12-9
Efficacy of CBT for Abuse Survivors	12-10
Alternative Treatment Approaches	12-11
Supplements	12-11
Exercise	12-12
St. John's Wort	12-12
Summary	12-13

Chapter 13: Clinical Management of Posttraumatic Stress Disorder

Diagnosis of PTSD	13-2
Initial Screening	13-2
Diagnostic Criteria for PTSD	13-2
Complex PTSD	13-3
Treatment	13-4
Patient Education	13-4
Normalization	13-4
Removing Self-Blame and Self-Doubt	13-5
Correcting Misunderstandings	13-5
Clinician Credibility	13-5
The Efficacy of Patient Education	13-5
Peer Counseling	13-5
Psychotherapy	13-5
Cognitive-Behavioral Therapy	13-6
Eye Movement Desensitization and Reprocessing	13-7
The Efficacy of Psychotherapy	13-8
Medications	13-8
Antidepressants	13-9

Benzodiazepines 13-10
 Adrenergic Agents 13-11
 Anticonvulsants 13-11
 Phases of Treatment With Medications 13-11
 Summary of Treatment for PTSD 13-13

Chapter 14: Basic Pain Management in a Health Care Setting

Why Pain Is Difficult to Treat 14-2
 Management of Chronic Pain 14-2
 Assessment 14-2
 Treatment Team 14-2
 Barriers to Treatment 14-3
 Pharmacological Treatment of Chronic Pain 14-3
 Non-Steroidal Anti-Inflammatory Drugs 14-3
 Narcotics 14-4
 Antidepressant Medications 14-4
 Nonpharmacological Management of Chronic Pain 14-5
 Relaxation Techniques 14-5
 Progressive Muscle Relaxation 14-5
 Biofeedback 14-6
 Cognitive Aspects of Pain Management 14-6
 Patient Education 14-6
 Pain Diary 14-7
 Activity Pacing 14-7
 Pleasant-Activity Scheduling 14-7
 Addressing Beliefs About Pain 14-7
 Reframing or Cognitive Restructuring 14-7
 Physical Treatments 14-8
 Physical Therapy 14-8
 Chiropractic and Acupuncture 14-9
 Practitioner Misbeliefs About Chronic Pain 14-9
 Some Final Suggestions for Clinicians 14-10
 Summary 14-11

Epilogue

Table of Acronyms A-63

Appendix A: Treatment of Traumatized Children App. A-1

Appendix B: Online Resources for Depression App. B-1

Appendix C: Online Resources for Posttraumatic Stress Disorder App. C-1
Appendix D: Online Resources for Pain App. D-1
Appendix E: Clinical Self-Care App. E-1
Appendix F: Bibliography App. F-1
