For our children, Lorelle and Collin Knight and Laura Farabee.

Acknowledgement

We wish to express our sincere appreciation and gratitude for M. Douglas Anglin, Associate Director of the Integrated Substance Abuse Programs (ISAP) at the University of California, Los Angeles. Dr. Anglin was one of the pioneers in examining the effectiveness of correctional drug abuse treatment. Drawing from decades of his own empirical work and independent analysis of the literature, his voice has been a powerful force in shaping substance abuse policy. His mentoring has established and inspired the careers of numerous researchers in the areas of substance abuse and correctional treatment, and we are grateful to be among them.

Foreword

by Redonna K. Chandler, Ph.D.

Approximately 6.9 million people are involved with some aspect of the criminal justice system, including 2.1 million incarcerated in prisons or jails and 4.8 million under community-based probation or parole supervision (Glaze & Palia, 2004). Drug abuse contributes significantly to this problem as evidenced by the number of individuals committing drug-related offenses including possession and/or sale of drugs; crimes committed to support drug use, or while under the influence of drugs; and crimes related to the deviant lifestyle associated with drug use. Drug use on the part of the perpetrator is estimated to be involved with over 50% of violent crimes, 75% of the drug dealing or manufacturing cases (Mumola, 1999) and 60%-80% of child abuse and neglect cases (Kropenske, et al., 1994) in the United States.

Public health problems including drug abuse are pervasive among the criminal justice population. Approximately 53% of state and 45% of federal prisoners meet the DSM-IV criteria for drug dependence or abuse (Mumola & Karberg, 2006). Among jail inmates, 52% of female and 44% of male detainees met criteria for alcohol and /or drug dependence (Karberg & James, 2005). Drug addiction is also a serious problem for adolescents involved in the juvenile justice system. An estimated 1.6 million youth are involved in the juvenile system. Of those arrested and detained, 75% report drug involvement (National Institute of Justice, 2001). Left untreated, adolescent and adult offenders with drug abuse problems are likely to continue using drugs and committing crimes.

Research has also identified high rates of mental illness among substance-abusing offenders. Surveys of jails and prisons found that 60% of jail inmates, 49% of state inmates, and 40% of federal inmates manifested symptoms of mental health problems (James & Glaze, 2006). In addition, data from this research indicates that among those with mental health problems, 76% of jail inmates and 74% of state inmates also met criteria for substance dependence or abuse. Similarly, Hiller, Knight, and Simpson (1996) found that 80% of probationers sentenced to participate in substance abuse treatment had a wide range of mental health problems. Among a large sample of detained youth in the Cook County, Illinois Juvenile Department of Corrections, psychiatric disorders were found in two-thirds of boys and almost three-quarters of girls and approximately half of boys and girls with identified substance use disorders had co-occurring mental health conditions (Teplin, Abram, McClelland, Dulcan, & Mericle, 2002).

While treatment need is great, few addicts receive treatment while involved in the criminal justice system. Research estimates that fewer than 18% of state and federal prison inmates received treatment while incarcerated (Mumola & Karberg, 2006) and less than one-third of jail inmates received treatment while detained or under the supervision of the criminal justice system (Karberg & James, 2005).

Addressing the problem of drug use among those in the criminal justice system is challenging and requires the merger of two different cultures: public health that seeks

to treat addicts and public safety that seeks to protect the community. Criminal justice sanctions including fines, community service, probation, and incarceration often fail to identify and address the root causes of criminal behavior, including drug abuse. Drug abuse treatment seeks to assist individuals in changing perceptions, attitudes, and behaviors that support drug use. Interrupting the drug abuse-crime cycle requires an approach that blends criminal justice supervision, drug testing, and accountability for behavior with effective treatment practices and approaches. This can be accomplished in a variety of criminal justice settings including drug courts, probation, prison- or jail-based treatment, and community-based treatment following release from prison or jail.

A robust body of research spanning the last two decades provides strong evidence that drug abuse treatment can effectively reduce drug use and criminal activity while increasing pro-social behaviors (Fletcher & Chandler, 2006). Effective drug abuse treatment programs tailor interventions to address the multiple needs of drug abusers and may incorporate a variety of behavioral and pharmacological interventions intended to assist the addict in changing perceptions, attitudes, values, and behaviors associated with drug use. Juveniles bring with them a number of serious problems including substance abuse, academic failure, emotional problems, family issues, and physical or sexual abuse histories. Addressing the treatment needs of this group often requires a family-based model that seeks to increase family functioning. Finally, treatment for addicted offenders should target antisocial attitudes, beliefs, and values associated with criminal behavior (Fletcher & Chandler, 2006).

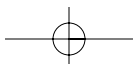

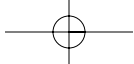

Public health and public safety systems have an extraordinary opportunity to work together and intervene in the lives of addicted offenders. *Treating Addicted Offenders, Volume 2* seeks to provide treatment and criminal justice professionals with the most recent research findings on how to effectively address drug abuse and co-occurring mental health problems among adult and juvenile offenders. Edited and written by nationally known researchers and practitioners from the drug abuse treatment and criminal justice field, this book serves as a valuable resource guide to professionals working with this population. In addition to presenting research on evidence-based approaches to screening, testing, and treatment, innovative programs and promising new practices intended to reduce drug use and criminal activity are highlighted. Finally, issues that challenge the delivery of quality drug abuse and mental health treatment including the need for multiple episodes of care, how to deal with relapse, the necessity of individualized treatment accessing a continuum of treatment options, and maintaining continuity of care as offenders move through different components of the system are presented. All those involved with this text are to be congratulated for the depth and breadth of information contained within its pages.

Author's Note

Redonna K. Chandler, Ph.D., is Chief, Services Research Branch at the National Institute on Drug Abuse. The views expressed in this text are those of the author and do not necessarily reflect the opinions of the National Institute on Drug Abuse.

About the Editors

Kevin Knight, Ph.D. is a Research Scientist at the Institute of Behavioral Research (IBR) at Texas Christian University. In addition to co-editing *Treating Addicted Offenders: A Continuum of Effective Practices, Volume 1*, he has published several articles that center on evaluating substance abuse treatment process and outcomes, as well as on the development of evaluation systems for correctional settings. Dr. Knight currently is serving as the Southwest Research Center Principal Investigator on the Criminal Justice Drug Abuse Treatment Studies (CJ-DATS) project, a large National Institute on Drug Abuse (NIDA)-funded cooperative agreement designed to improve correctional treatment. He has worked closely with criminal justice agencies and data systems at national, state, and regional levels in the United States. Dr. Knight also serves on journal editorial boards, including serving as co-editor of *Offender Substance Abuse Report*, and participates in advisory activities for a variety of organizations that address substance abuse and related policy issues.

David Farabee, Ph.D. is Research Psychologist at the University of California, Los Angeles and Director of the Integrated Substance Abuse Programs (ISAP) Juvenile Justice Research Group. Prior to this he served as lead analyst for criminal justice research at the Texas Commission on Alcohol and Drug Abuse (1992-1995), and as Assistant Professor of Psychiatry and Research Scientist at the University of Kentucky Center on Drug and Alcohol Research (1995-1997). He is currently Principal Investigator of a clinical trial comparing four types of counseling styles with regard to their ability to promote abstinence for stimulant abusers (funded by the National Institute on Drug Abuse), and Co-Principal Investigator of the Criminal Justice Drug Abuse Treatment Studies (CJ-DATS) (also funded by NIDA). He has published in the areas of substance abuse, adult and juvenile crime, HIV/AIDS, and offender treatment, was co-editor of the books *Treatment of Drug Offenders* (2002; New York: Springer) and *Treating Addicted Offenders: A Continuum of Effective Practices, Volume 1* (2004; New York: Civic Research Institute), author of *Rethinking Rehabilitation: Why Can't We Reform Our Criminals?* (2005; Washington, D.C.: AEI Press), and is co-editor of *Offender Substance Abuse Report*.

Introduction

by Kevin Knight, Ph.D., and David Farabee, Ph.D.

When we published the first volume of *Treating Addicted Offenders* in 2004, we emphasized the notion that if addiction does indeed behave like a chronic disease then treatment should be a continuous enterprise as well. We also recognized that the same rule applies to research regarding substance abuse and crime. A single snapshot of the literature cannot adequately capture such an active area of research for long. Thanks to the scholars who have contributed to this book (and to the *Offender Substance Abuse Report*, from which many of these chapters were selected), this second volume offers fresh perspectives and current empirical work that reflect the continuous growth of this literature.

The chapters in this volume are grouped into seven categories: Epidemiology, Screening & Assessment, Innovative Approaches, Drug Courts, Mental Health, Juvenile Offenders, and Challenging Perspectives. We provide some context for these themes at the outset of each section. In addition, as in the first volume, we have included a Legal Issues section as an Appendix. The latter summarizes and provides commentary on selected legal cases pertaining to the substance-abusing offender population.

As Dr. Chandler noted in the Foreword to this volume, the high prevalence of substance use disorders among adult offenders poses an enormous public health problem—and an opportunity. Moreover, the high co-occurrence of drug use, mental illness, and HIV risk among youthful offenders underscores the need to intervene early and to expand our focus to include primary and secondary prevention.

The need to effectively intervene with this population is clear. Less clear is what these interventions should be. The criminal justice system not only provides a point of access to treatment services; it also offers the threat of sanctions should offenders fail to uphold their end of the bargain. Finding the right mix of effective interventions and correctional supervision is an important goal and one that merits scrutiny and debate. We believe that *Treating Addicted Offenders, Volume 2* is an excellent source of current thinking and research that can inform our ongoing quest for effective programs and practices for substance-abusing offenders.

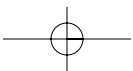

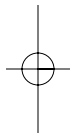

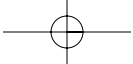

Table of Contents

Foreword	vii
About the Editors	xi
Introduction	xiii

PART 1: EPIDEMIOLOGY

Chapter 1: Substance Abuse and Criminal Specialization in an Arrestee Sample

*Angela Hegamin, Ph.D., M.S.P.H., David Farabee, Ph.D., Ake Tzu-Hui Lu, Ph.D.
and Douglas Longshore, Ph.D.*

Introduction	1-2
Order of Drug/Crime Initiation and Type of Crime	1-2
Current Study: Drug-Crime Relationship in an Arrestee Population	1-2
Study Method	1-3
Study Sample	1-3
Measures Used	1-4
Demographics	1-4
Drug-Use Career	1-5
Treatment Utilization	1-6
Criminal Career	1-6
Analytic Method	1-6
Discussion of Findings	1-7
Comparative Results	1-7
Distinctions in Drug-Use Patterns	1-7
Results Compared to Earlier Studies	1-7
Findings in Common	1-8
Findings That Differed	1-8
Conclusions	1-9
Predatory Crime Related to Later Onset of, but Not to Particular, Drug Use	1-9
Rehabilitation Should Focus on Primary Problem	1-9

Chapter 2: Substance Dependence, Abuse, and Treatment of Jail Inmates, 2002

Jennifer C. Karberg and Doris J. James

Introduction	2-2
Majority of Jail Inmates Met Dependence or Abuse Criteria	2-2
Diagnostic Criteria and Overall Prevalence	2-2
Female vs. Male Jail Inmates	2-3

Racial, Ethnic, and Age Group Variances	2-3
Criminal Life/History Characteristics	2-5
Dependence or Abuse More Prevalent Among Drug or Property Offenders	2-5
Unstable Family History	2-5
Prior Criminal Record	2-5
Changes in Abuse Patterns	2-6
Alcohol Use	2-6
Regular Drug Use	2-6
Use of Substances at Offense	2-6
Usage Patterns	2-6
Type of Offense	2-8
Dependence or Abuse Status of Offenders	2-8
Participation in Substance Treatment or Programs	2-9
Past Participation	2-9
Participation While Under Correctional Supervision	2-10
Inmates Who Used Alcohol	2-10
Inmates Who Used Drugs	2-11
Gender, Race, or Ethnicity and Participation	2-11

Chapter 3: Estimating the Prevalence of Ecstasy Use Among ADAM Arrestees

George S. Yacoubian, Jr., Ph.D.

Measuring the Prevalence of U.S. Drug Use	3-1
Does Ecstasy Move From Deviant to General Population?	3-2
The ADAM Hypothesis	3-2
Studies of Ecstasy Among Arrestees	3-2
Study Methodology	3-2
Data Analysis	3-4
Conclusion	3-4

PART 2: SCREENING AND ASSESSMENT

Chapter 4: Evaluating Brief Substance Abuse Screening Instruments for Drug-Involved Offenders

Matthew L. Hiller, Ph.D. and Egle Narevic, Ph.D., M.S.W.

Introduction	4-1
Evaluating the SSI and TCUDS:	4-2
Study Population	4-2
Project Method	4-2
The Simple Screening Instrument	4-2
The Texas Christian University Drug Screen	4-3

Analysis Method	4-4
Project Results	4-5
Results From the SSI	4-5
Results From the TCUDS	4-5
Internal Consistency Reliability	4-5
Agreement Between SSI and TCUDS	4-6
Practical Implications	4-6

Chapter 5: Screening for Co-Occurring Psychiatric Disorders Among Addicted Offenders: Adaptation and Use of the K6/K10 Screening Scales

James A. Swartz, Ph.D.

Introduction	5-2
A Need for a Viable Screening Tool	5-2
Development of the K6/K10 Scales	5-2
Testing the Scales for Criminal Justice Populations	5-2
Which Psychiatric Disorders Constitute an SMI?	5-3
Broadening the Definition of SMI	5-3
Diagnosis and Symptom Severity	5-3
Overestimating the Need for Treatment	5-3
Underestimating the Need for Treatment	5-4
Including Symptom Severity and Functional Impairment in Determining Treatment	5-4
The K6/K10 Scales	5-5
Core Items	5-5
Rating Symptoms	5-5
Why There Are Two Scales	5-6
Preliminary Studies	5-6
Study Population Samples	5-6
Research Questions	5-7
Results	5-7
Prevalence Rates	5-7
Classification Results	5-8
Co-Occurring Substance Use Disorders and Arrest Likelihood ..	5-8
Conclusions	5-9
K6 Appears to Be as Discriminating as K10	5-9
Need for Following Up	5-9
Possible Cut-Point Adjustments	5-10

Chapter 6: Multimodality Quality Assurance Instrument for Prison- and Community-Based Substance Abuse Treatment Programs

Gerald Melnick, Ph.D. and Harry K. Wexler, Ph.D.

Introduction 6-1

Development of the MQA 6-2

The MQA Instrument 6-2

 Four Parallel Forms 6-2

 Domains Covered 6-3

The MQA Report to Programs 6-3

Validity of the MQA 6-5

Application of the MQA to Different Populations 6-5

Research Application of the MQA 6-6

Conclusion 6-6

Chapter 7: The Validity of Self-Reported Information From Prisoners in a Modified Therapeutic Community

Matthew Hiller, Ph.D. and Egle Narevic, Ph.D., M.S.W.

Introduction 7-1

Study Method 7-2

Results 7-2

 Demographic Information 7-2

 Criminal History 7-2

Conclusion 7-4

Chapter 8: Psychopathy as a Measure of Offender Risk: An Important Component of a Comprehensive Risk Assessment Battery

Matthew S. Shane, Ph.D. and Kent A. Kiehl, Ph.D.

Introduction 8-1

The Psychopathic Construct 8-3

Psychopathy and Antisocial Personality Disorder 8-5

Assessment of Psychopathy 8-5

Psychopathy as a Predictor of Criminality 8-7

Comparison of Psychopathy and Substance Abuse as Predictors of Risk 8-8

 Psychopathy a More Robust Predictor of Offending Than Is Substance Abuse 8-8

 Psychopathic Individuals Show Higher Rates of Crime Regardless of Comorbid Substance Abuse Problems 8-8

 Substance Abuse a Less Sensitive Predictor of Criminal Characteristics When Dealing With Psychopathic Individuals 8-8

Resistance to Treatment 8-9

Conclusions 8-10

PART 3: INNOVATIVE APPROACHES

Chapter 9: Maximum-Security Prison Therapeutic Community and Aftercare: First Outcomes

Harry K. Wexler, Ph.D., William M. Burdon, Ph.D. and Michael L. Prendergast, Ph.D.

Introduction: TC Programs in the U.S. Prison System 9-1

Study of Differential Impact of Maximum- and Lower-Security TC Programs . . . 9-2

 Method 9-2

 Data Collection 9-3

 Dependent Variable 9-3

 Independent Variables 9-4

 Mental Disorder 9-5

 Alcohol/Drug Disorder 9-5

 Treatment Outcome Statue 9-5

 Motivation for Treatment 9-6

Study Population 9-6

 Demographic Characteristics 9-6

 Differences in Drug Use, Criminal History, and Treatment 9-6

Treatment Outcomes 9-7

 12-Month Return-to-Custory Rates 9-7

 Variance Attributable to Treatment Outcome Status 9-8

Summary and Conclusions 9-9

Chapter 10: Bridges to Life: A Promising Faith-Based Prison Intervention for Substance Use

Marilyn Peterson Armour, Ph.D., M.S.W.

Introduction 10-1

 Addressing the Problem of Aftercare 10-2

 Developing Culturally Appropriate Interventions 10-2

The Bridges to Life Program 10-3

 Group Sessions 10-3

 Offender Participants 10-3

 Other BTL Participants 10-4

 Victim Volunteers 10-4

 Facilitators 10-4

 Nonsectarian Programming 10-4

 A Collaborative Program 10-5

Critical Role of Crime Victims 10-5

Substance Abuse and Shame 10-6

BTL Participant Assessment Survey 10-6

Methodology and Analysis	10-6
Findings	10-7
Discussion and Conclusions	10-9

Chapter 11: Behavioral Reinforcement in Prison-Based Substance Abuse Treatment: Integrating an Evidence-Based Innovation

William M. Burdon, Ph.D. and Michael L. Prendergast, Ph.D.

Introduction	11-1
Overview of Prison-Based Substance Abuse Treatment	11-2
Therapeutic Communities	11-2
Cognitive-Behavioral Treatment	11-2
Room for Improvement	11-3
Client Engagement in Treatment and Behavioral Reinforcement	11-3
Obstacles to Program Success in Prison	11-3
Reinforcing Positive Behaviors: Contingency Managements	11-4
Role of Behavioral Reinforcement in the Prison Context	11-5
Integrating Behavioral Reinforcement into Prison Setting	11-6
Need for Innovativeness	11-6
Diffusion of Innovations Theory	11-6
Organizational Climate vs. Organizational Culture	11-7
Obstacles to Integration Within a Prison-Based Program	11-8
Conclusion	11-8

Chapter 12: Influencing Motivation for Change Using the Addiction/Offender Cycle

Edward A. Roberts, M. A., LCDC, RTC and Judith A. DeTrude, Ph.D., LPC, LMFT

Introduction	12-1
The Addiction/Offender Cycle	12-2
Case Study #1: Getting Away With It	12-2
The Permission Statement	12-2
Finding a Pattern; Asking the Group	12-3
An Effective But Not Infallible Tool	12-4
Case Study #2: Chronic Defiance	12-4
The Activating Event	12-4
Denial of Drug Use	12-5
Finding a Pattern	12-5
Finding a Way to Change	12-6
Accepting the Problem and Need for Treatment	12-6
Counseling as a Contextual Factor	12-6
Allowing Discovery; Disturbing the Comfortable	12-7

Chapter 13: An Experiment on the Inclusion of Strength Training in Offender Substance Abuse Treatment

DJ Williams, Ph.D., LCSW

Introduction	13-2
Earlier Research on Physical Activity as a Possible Treatment Adjunct	13-2
Positive Findings	13-2
Less Clear Findings	13-3
Matching Patients to Treatment	13-3
Impact of Assessing Readiness to Exercise	13-3
Scope and Parameters of Present Experiment	13-4
Definitions	13-4
Method	13-4
Study Participants	13-5
Instrumentation and Procedures	13-6
The Experimental Group Protocol for Strength Training	13-6
Analysis of Results	13-7
Treatment Completion and Relapse Rates	13-8
Exercise Readiness and Exercise Behavior	13-9
Participants' Satisfaction	13-10
Conclusion	13-10
Summary of Findings	13-10
Study Limitations	13-11
Program Recommendations	13-11
Future Research	13-12

Chapter 14: Institutional Adjustment in Male Inmates Completing a 20-Week Drug Lifestyle Intervention

Glenn D. Walters, Ph.D.

Need Exceeds Available Treatment	14-1
The Lifestyle Change Program	14-2
Current Study on Efficacy of the Advanced Drug Lifestyle Group	14-3
Hypothesis	14-3
Study Method	14-3
Participants	14-3
Procedure	14-4
Study Results	14-5
Discussion: Divergent Effects	14-6
White Participants	14-6
Non-White Participants	14-6
Cultural Effects	14-7
Conclusion	14-7

Chapter 15: Peering Into the Black Box of Mandatory Drug Treatment

Douglas Young, M.S.

Introduction 15-1

Development of Research Questions 15-2

Study 1: Impact of Perceived Legal Pressure on Treatment Retention 15-4

 Method 15-4

 Results 15-4

 Implications 15-4

Study 2: Comparing Program Retention and Perceived Coercion in
Three Models of Mandatory Drug Treatment 15-5

 Method 15-5

 Results 15-6

 Evidence Supports DTAP and TASC 15-6

Study 3: PLP Development and Drug Court Study 15-7

 Method 15-8

 Equivocal Findings 15-8

 Legal Pressure in the Larger Context 15-9

Conclusion 15-10

PART 4: DRUG COURTS

Chapter 16: Drug Court Efficacy vs. Effectiveness

Douglas B. Marlowe, J.D., Ph.D.

Extensive Research but Contradictory Conclusions 16-1

High-Quality Studies Support Drug Courts 16-2

Parametric Studies Buttress Support 16-3

Need for Performance Benchmarks and Best Practices 16-3

Chapter 17: Accreditation Is Key to Creating the Next Generation of Drug Courts

John Roman, M.P.P.

Self-Promotion vs. Objective Measure 17-1

Time for a Different Research Agenda 17-2

Accreditation, Research, and Efficacy 17-3

Conclusion 17-3

**Chapter 18: An Examination of Peer Relations and Employment Among
Female Drug Court Participants**

*Michele Staton Tindall, Ph.D., M.S.W., Jamieson L. Duvall, M.A., Carrie B. Oser,
Ph.D., Carl Leukefeld, D.S.W., J. Matthew Webster, Ph.D. and Jennifer Mooney, M.A.*

Substance Use, Employment Stability, and Relapse 18-2

Employment More Complicated for Female Offenders 18-2

Employment and Healthy Relationships	18-3
Employment as a Gateway	18-3
Peer Influence on Behavior	18-4
Current Study	18-4
Study Participants	18-4
Study Measures	18-5
Employment	18-5
Drug Use	18-5
Peer Relations	18-5
Study Procedures	18-6
Analytic Plan and Study Results	18-6
Descriptive Analyses	18-6
Bivariate Relationships	18-7
Predicting Employment	18-8
Discussion of Findings	18-9
Peer Relations as Predictor of Employment Patterns	18-9
Impact of Relationships	18-10
Study Limitations	18-10
Recommendations	18-11

PART 5: MENTAL HEALTH

Chapter 19: Mental Health Diversion: Effects of Mandated vs. Non-Mandated Strategies

Nahama Broner, Ph.D., Damon W. Mayrl, M.A. and Gerald Landsberg, M.S.W., M.P.A., D.S.W.

Introduction	19-2
The Effects of Diversion Programs	19-2
What Accounts for Positive Outcomes?	19-3
Study Population	19-3
Study Procedures and Measures	19-5
Study Results	19-6
Mandated Clients vs. Other Subjects	19-6
Who Benefits? The Effects of Client Differences	19-6
Positive Characteristic: Degree of Insight	19-7
Negative Characteristics	19-7
Time in Treatment	19-7
Medication Compliance	19-7
Programmatic and Policy Implications	19-8
Mandating Treatment Improves Some Client Outcomes	19-8
Quality and Breadth of Service Also Count	19-8

Attention Must Be Paid to Specific Client Characteristics 19-9

Sufficient Evidence to Support Diversion Programs 19-9

 Possible Drawbacks of Mandated Approach 19-10

 Possible Structured Alternatives 19-10

Chapter 20: Monitoring Drug Use and Medication Adherence Among Mentally Ill Parolees

David Farabee, Ph.D.

Introduction 20-1

Study Population and Methods 20-2

Study Results 20-2

 Self Reports 20-2

 Concordance Rates for Negative Measures 20-2

Practical Implications 20-3

Chapter 21: The Cook County Mental Health Court: Development, Implementation, and Initial Implications

Lisa Braude, Ph.D.

Introduction 21-2

Mental Illness and Criminal Justice Involvement 21-2

 Changes in the Mental Health Service Delivery System 21-2

 Mental Health Treatment in Prison 21-3

The Cook County Mental Health Court Model 21-4

 Program Goals 21-4

 Process and Partners 21-5

 Monthly Meetings and Partner Outreach 21-6

Relevant Policy Implications and Lessons Learned 21-7

 Systematizing Interventions: Incremental Expansion 21-7

 Seamless Transition Between Services 21-8

 Leveraging of Existing Resources 21-8

 Incorporating Evidence-Based Practices 21-9

 Working With the Highest-Risk Populations 21-10

 Integrating Intensive Case Management Through TASC 21-10

 Reducing Stigma and Discrimination 21-11

 Mandating Treatment 21-11

 Incorporating Law Enforcement 21-12

Current Activity 21-12

Chapter 22: A Pilot Study of Co-Occurring Psychiatric, Substance Use, and Medical Disorders Among Jail Detainees in Psychiatric Treatment

James A. Swartz, Ph.D.

Introduction	22-1
Individuals With Co-Occurring Disorders and the Criminal Justice System	22-2
High Risk of Involvement	22-2
Untreated Disorders	22-3
Cook County Pilot Study	22-3
Study Population and Method	22-4
Study Findings	22-4
Arrest History	22-4
Psychiatry/Substance Use History	22-5
Medical Disorder	22-5
Implications for Practice and Research	22-6
Challenge to the Criminal Justice and Treatment Communities	22-7

PART 6: JUVENILE OFFENDERS

Chapter 23: Predicting Violence in Juvenile Offenders: The Interaction of Individual, Social, and Environmental Influences

Michelle White, Ph.D.

Juvenile Offenders and Criminal Career Trajectories	23-1
Need for Substance Abuse Treatment	23-1
Predictive Factors	23-2
The Cannabis Youth Treatment Study	23-3
Study Design and Population	23-3
Study Measures	23-3
Study Findings	23-4
Analysis of Findings	23-6
The GAIN CVS as a Risk Assessment Measure	23-6
Reducing Risk	23-6
Study Limitations	23-7
Conclusions	23-7

Chapter 24: Multidimensional Family Therapy for Substance Abusing Young Offenders

Cynthia L. Rowe, Ph.D., Gayle A. Dakof, Ph.D. and Howard A. Liddle, Ed.D., ABPP

Challenges for the Juvenile Justice System	24-2
Specialized Treatments for Adolescent Substance Abusers	24-2
An Integrative and Systemic Approach	24-2
Multidimensional Family Therapy	24-3

Empirical Development and Refinement	24-3
Multiple Pathways, Contexts, and Mechanisms	24-4
MDFT in Practice	24-4
Modifications to Suit Different Clinical Needs	24-4
Levels and Stages	24-4
Adolescent Core Interventions	24-5
Core Interventions With the Parent(s)	24-5
Core Interventions With the Family	24-6
Core Interventions in the Extrafamilial Realm	24-6
Collaborating With The Juvenile Justice System	24-6
Working With Probation Officers	24-6
Enlisting the Court's Involvement	24-7
Benefits	24-7
MDFT Treatment Outcomes With Young Substance Abusing Offenders	24-8
New Directions for MDFT Research Within the Juvenile Justice System	24-9
Cross-Systems Collaboration From Detention to the Community	24-9
Collaboration With Juvenile Drug Court	24-9
Summary	24-10

Chapter 25: First Count to Ten: Innovation and Implementation in Juvenile Reintegration Programs

Douglas Young, M.S.

Introduction	25-1
Background	25-3
Organizational Framework	25-3
The IAP Model	25-4
Method	25-5
Results and Discussion	25-7
Mission and Strategy	25-7
Leadership	25-9
Organizational Culture	25-9
Systems	25-10
Structure	25-11
Management Practices	25-11
Motivation	25-12
Job-Skills Match	25-13
Summary and Conclusion	25-13

Chapter 26: The Correlates and Consequences of Drug Involvement Among Youths Entering a Juvenile Justice Diversion Program

Richard Dembo, Ph.D., Jennifer Wareham, Ph.D., Norman Poythress, Ph.D., Brittany Cook, B.A. and James Schmeidler, Ph.D.

Introduction	26-1
Multiple Problems of Youth in Justice System	26-2
Current Study Method	26-2
Study Sample	26-3
Demographics	26-3
Arrest Charges Leading to Diversion Involvement and Prior Charges	26-3
Measuring Alcohol and Other Drug Use	26-4
Measuring Related Behavior and Psychosocial Functioning	26-5
Self-Reported Delinquent Behavior	26-5
Psychosocial Functioning	26-5
Analysis of Results	26-6
Policy and Practice Implications	26-7

Chapter 27: Therapeutic Community Treatment for Juveniles Sentenced as Adults: Findings From Delaware's Young Criminal Offender Program

Christine A. Saum, Ph.D., Alison R. Gray, B.A. and Jill A. Walters, M.A.

Substance-Abuse Treatment Needs of Youth in Adult Prisons	27-1
Corrections-Based Substance Abuse Treatment for Adolescents	27-2
Path to Treatment	27-2
Treatment Strategies and Programs	27-3
Delaware's Young Criminal Offender Program	27-4
Overview	27-4
Current Study	27-5
Purpose	27-5
Study Sample	27-5
Study Results	27-6
Substance Abuse	27-6
Program Completion	27-7
Conclusions	27-8

PART 7: CHALLENGING PERSPECTIVES

Chapter 28: Implementing a Readiness Program for Mandated Substance Abuse Treatment

Laura Winterfield, Ph.D. and Jennifer Yahner, M.A.

Introduction	28-2
Research Question	28-3
Data Used: The <i>Returning Home</i> Study	28-3

Description of the Population Sample	28-4
Demographics	28-4
Criminal and Substance Use History	28-5
Methodology	28-5
Pre-Prison Drug Problem	28-5
In-Prison Substance Abuse Services	28-6
Post-Prison Substance Abuse Services	28-6
Research Findings	28-6
Matching Treatment to Need	28-6
Continuity of Treatment	28-7
Discussion of Possible “Correlates”	28-8
Successful Treatment Matching	28-8
Continuity of Treatment	28-11
Discussion	28-12
Policy and Practice Implications	28-12
Routine Screening	28-12
Correctional System vs. Treatment Mission Views	28-13
Institutional Incentives	28-13
Increasing Continuity of Service	28-14
Integrating Research Into Practice	28-14
Treatment Improvement Protocol	28-14
Enhancing Prisoners’ Motivation for Change	28-15
Treatment Improvement Protocol	28-15
Future Research	28-15
Conclusion	28-15

Chapter 29: Drug Dependence Is Omnigenus: The Disease Analogy and Criminal Justice Policy

Douglas B. Marlowe, J.D., Ph.D., David S. DeMatteo, J.D., Ph.D., David S. Festinger, Ph.D. and Nicholas S. Patapis, Psy.D. M.A.C.J.

Introduction	29-1
Drug Policy by Analogy	29-2
Similarities and Differences in Pathophysiology	29-3
Similarities and Differences in Onset and Course	29-4
Similarities and Differences in Treatment Response	29-5
Similarities and Differences in Society’s Response	29-5
Science Over Analogies	29-6

Chapter 30: Staying in Treatment: How Much Difference Is There From Prison to Prison?

Bernadette Pelissier, Ph.D., Scott D. Camp, Ph.D. and Mark Motivans, Ph.D.

Introduction	30-1
Measures of Program Tenure	30-2
Purpose of Study and Methodology	30-2
Study Sample	30-2
Predictor Variables	30-3
Individual-Level Predictors	30-3
Program-Level Predictors	30-3
Analytic Methods	30-4
Study Results	30-5
High Treatment Retention	30-5
Considerable Variation Across Programs	30-5
Covariates Associated With Non-Completion	30-6
Practical Implications for Programming	30-7
Addressing Acting-Out Behavior	30-8
Motivation for Change and Motivational Interviewing	30-8
Programs for Women	30-9
Program Implementation and Philosophy	30-9

Chapter 31: Professionalizing the Substance Abuse Treatment Field: An Invitation for Discussion

Igor Koutsenok, M.D.

Defining "Paraprofessional"	31-1
Professional vs. Paraprofessional Treatment Skills and Outcomes	31-2
Critical Points Drawn From the Literature Review	31-5
A Call for Specialized Training in Addiction	31-6
The UCSD Survey	31-6
Areas of Study	31-7
Demand for More Personnel Should Not Override Need for Training	31-8
Next Steps	31-8

Chapter 32: The Racial/Cultural Identity Development Model and Correctional Treatment

Edward A. Roberts, M.S., L.C.D.C., R.T.C.

Introduction	32-1
Differing Perspectives of Cultural Significance	32-2
Worldview Shaped by Both Personal and Cultural Experience	32-3
Responsivity: The Role of Culture	32-3
Significance of Cultural Identification in Criminal Justice Populations	32-4

The Racial/Cultural Identity Development Model	32-4
Stage 1: Conformity	32-5
Stage 2: Dissonance	32-5
Stage 3: Resistance and Immersion	32-6
Stage 4: Introspection	32-6
Stage 5: Integrative Awareness	32-6
Acculturation Case Study: A Gang Member's Hatred	32-6
Effectiveness Rooted in Empathy	32-8

Chapter 33: Interagency Priorities at the Crossroads: Aftercare Among Drug Users

Bernadette Pelissier, Ph.D. and Timothy Cadigan, M.A.

Introduction	33-1
Study to Assess Transition From BOP to AOUSC	33-2
Drug Treatment Services	33-3
The Residential Drug Treatment Program	33-3
Transitional Services	33-3
The Substance Abuse Treatment Program	33-3
Study Research Questions	33-3
Study Data	33-4
Associated Background Characteristics	33-4
District Differences	33-5
Data Analysis Method	33-5
Study Results	33-5
Treatment Received	33-5
Reentry and Continuity of Care	33-6
Individual Characteristics as Predictors	33-7
Variation Between Districts	33-8
Systemic Approach Needed	33-8

Chapter 34: Stigma Reduction: The Program Rehabilitation and Restitution Initiative

Harry K. Wexler, Ph.D., Gerald Melnick, Ph.D. and Michael Chaple, M.A.

Introduction	34-2
Consequences of a Felony Conviction	34-2
Patchwork Pattern of Laws	34-2
Barriers to Employment	34-3
Restrictions on Citizenship	34-4
Impact on Families and Community	34-4
Sealing Criminal Records: Part of a Solution	34-4
The Program Rehabilitation and Restitution Initiative	34-5

Goals 34-5

Case Management and TASC 34-5

Two PRR Programs 34-6

Evaluation and Technical Assistance 34-7

 Formative and Summative Evaluations 34-7

 Periodic Reporting of Preliminary Findings 34-7

 General Characteristics 34-9

 Employment 34-9

 Drug of Choice 34-9

 Involvement in Illegal Activity 34-9

 Motivation for Drug Treatment 34-9

 Motivation for Record Sealing 34-10

Client Impressions of PRR 34-10

Use of Formative Evaluation Information 34-11

Summary 34-11

Chapter 35: Counselor Burnout and the Therapeutic Relationship

Bryan R. Garner, Ph.D. and Kevin Knight, Ph.D.

Introduction 35-2

The Concept of “Burnout” 35-2

Earlier Research on Burnout in Substance Abuse Treatment and
Correctional Staffs 35-2

 Individual and Organizational Factors Associated
 With Staff Burnout 35-3

 Impact of Counselor Experience and the Therapeutic Relationship 35-3

Current Study 35-4

 Rationale and Method 35-4

 Study Sample 35-5

 Study Procedures 35-5

 Study Measures 35-5

 Predictor Variables 35-5

 Outcome Variable 35-6

 Analytic Plan 35-6

 Study Results 35-7

Discussion: Current Study in Context of Earlier Findings 35-8

 Differences Among Counselors 35-8

 Counselor Age 35-8

 Counselor Race and Gender 35-9

 Counselor Certification 35-9

 Counselor Experience 35-9

TC-18

TREATING ADDICTED OFFENDERS

Burnout and Rapport 35-9

General Conclusions 35-10

Appendix 1: Legal Issues App.-1
Margaret R. Moreland, J.D., M.S.L.S.

**Appendix 2: Alternatives to Incarceration for Drug Offenders: 2006 Report
Supports Effectiveness of Treatment Over Incarceration** App.-41
Margaret R. Moreland, J.D., M.S.L.S.
