Advances in school-based mental health interventions: Best practices and program models/Steven W. Evans, Ph.D., Mark D. Weist, Ph.D., and Zewelangi N. Serpell, Ph.D.

ISBN 1-887554-62-9

Library of Congress Control Number: 2003114390
Developing and Implementing a Functional Assessment-Based Intervention Plan

Step 1: Prioritize and Define the Problem Behavior
Step 2: Conduct a Functional Assessment
  - Broad Information
  - Specific Information
  - Consequences
  - Indirect Methods—Interviews
  - Indirect Methods—Record Review
  - Direct Methods
Step 3: Develop Hypothesis Statements
Step 4: Develop the Intervention Plan
  - Event Interactions
  - Alternative Skill Instruction
  - Response Strategies
  - Long-Term Support
Step 5: Implement, Evaluate, and Modify the Plan

Case Example
Limitations and Further Research Needs
Conclusion

Chapter 3: Development of the Chicago Public School’s ADHD Policy Manual—From Community to University and Back
Marc S. Atkins, Ph.D., Jennifer Watling Neal, M.A., Joan Letendre, Ph.D., L.C.S.W., and Sue Gamm, J.D.

Introduction
The Origins of the ADHD Manual
  - The Reauthorization of IDEA
  - The CHADD National Conference
Due Process
  - Hearings
  - Legal Issues
  - Educational Practices
Planning of the ADHD Manual
  - Ideas
  - Activities
  - The Process
Goals of the ADHD Manual
  - Tensions Between Different Stakeholders’ Goals
  - Incorporating Diverse Feedback From Stakeholders
School District Policy on Stimulant Medication
Classroom Accommodations for Students With ADHD
Chapter 4: Quality and School Mental Health
Mark D. Weist, Ph.D., Sharon Stephan, Ph.D., Nancy Lever, Ph.D., Elizabeth Moore, M.S., Paul Flashpohler, Ph.D., Melissa Maras, M.A., Carl A. Paternite, Ph.D., and TJ Cosgrove, M.S.W., L.I.C.S.W.

Introduction ..................................................... 4-1
Community Science ............................................. 4-2
  Research-to-Practice Models ................................. 4-3
  Community-Centered Models ................................. 4-3
  Keeping Program and Service Development on Track ...... 4-3
Staff Selection and Training .................................... 4-4
Implementing Evidence-Based Practices ...................... 4-5
  Fostering Success ........................................... 4-5
  Training ....................................................... 4-6
    Modularized Training Approaches ......................... 4-7
    Coaching and Modeling .................................. 4-7
Policy Implementation ........................................ 4-7
Effectively Working With Families .......................... 4-8
Shared Model of Care ......................................... 4-8
Involving Families as Agents of Change ..................... 4-9
Program Evaluation .......................................... 4-10
Advancing Systematic Quality Assessment and Improvement
Frameworks ..................................................... 4-11
  School Mental Health Quality Assessment Questionnaire . 4-12
  Mental Health Program Evaluation Template ................ 4-12
  Mental Health Education and Training Initiative ........... 4-13
Future Directions ............................................. 4-14

Chapter 5: An Ecological Approach to Family Intervention and Treatment in Public Middle Schools
Thomas J. Dishion, Ph.D.
Introduction ..................................................... 5-2
Six Features of the EcoFIT Model ................................. 5-2
  Empirically Based Model ........................................ 5-2
  Family-Centered Interventions .................................. 5-3
  Assessment-Driven Interventions ............................... 5-4
  Target Social Interactions ...................................... 5-4
  Motivation to Change ........................................... 5-5
  Health Maintenance Framework ................................. 5-5

EcoFIT in Public Schools ........................................ 5-6
  Overview .......................................................... 5-6
  Communication and Cooperation .............................. 5-6
    Parent Resource Center ....................................... 5-7
    Home Visits .................................................... 5-7
  Screening and Choice of Intervention ....................... 5-7
    Teacher Ratings ............................................... 5-8
    The Family Check-Up ......................................... 5-8
    Feedback ......................................................... 5-9
    Motivation ....................................................... 5-9
  Intervention Menu .............................................. 5-10
    Check-Ins ....................................................... 5-10
    Skill Building .................................................. 5-11
    Adaptive Coping Sessions ................................... 5-12
      Emotional Support ............................................ 5-13
      Self-Efficacy ............................................... 5-13
      Coping Sessions ............................................. 5-13
    Overcoming Barriers to Effective Parenting ................ 5-13
  Summary of Structured Interventions ....................... 5-14
  Outcomes ........................................................ 5-14
    Engagement ...................................................... 5-14
    Effectiveness ................................................ 5-15
  Conclusion ....................................................... 5-16

Chapter 6: The Seven Sure Solutions to School-Based Mental Health
Services Success—The Necessary Collaboration Between School and
Community Providers
Howard M. Knoff, Ph.D.

Background: The Mental Health Status of School-Aged Students in
the United States .................................................... 6-2
  Definition and Advantages of SBMH Services ............... 6-3
  Realizing the Benefits of SBMH Services ................. 6-3

The Seven Sure Solutions: A Blueprint for School-Based Mental
Health Success .................................................... 6-4
Project ACHIEVE’s Integration of School-Based Mental Health and Positive Behavioral Support Systems ................................................. 6-5
  Positive Behavioral Support Systems ............................................. 6-5
  Strategic Intervention Services ...................................................... 6-5
  Crisis-Management Services ......................................................... 6-6
  Characteristics of the Integrated Approach ........................................ 6-6
  Positive Behavioral Self-Management System ...................................... 6-7

Shared Visions and Successful Implementation of the Seven Sure Solutions .......................................................... 6-7
  Solution 1: Visions for Students and Settings ...................................... 6-8
  The Child’s Ecological System ......................................................... 6-8
  Functional, Ecological Assessment ................................................... 6-9
  Intervention Services and Goals ...................................................... 6-10
  Extensions .................................................................................... 6-11
  Solution 2: Visions for Staff and Services ......................................... 6-11
  Strategic Intervention to Change Behaviors ......................................... 6-11
  Prevention Focus .......................................................................... 6-12
  Extensions .................................................................................... 6-13
  Solution 3: Visions for School and Structures ..................................... 6-14
  Solution 4: Visions for Systems and Synergy ..................................... 6-15
  Solution 5: Visions for Statistics and Systemic Improvement ............... 6-16
  Importance of Good Data .................................................................. 6-16
  Evaluation ..................................................................................... 6-16
  Solution 6: Visions for Selection and Stability .................................... 6-17
  Service Delivery Needs and Assessment ............................................. 6-18
  Staff and Staff Training ................................................................... 6-18
  Solution 7: Visions for Sustainability and Success ............................. 6-19

Conclusion ..................................................................................... 6-20

PART 2: PREVENTION AND MENTAL HEALTH PROMOTION

Chapter 7: School-Wide Interventions—The Foundation of a Public Health Approach to School-Based Mental Health
Bradley H. Smith, Ph.D., Brooke S. G. Molina, Ph.D., Greta M. Massetti, Ph.D.,
Daniel A. Waschbusch, Ph.D., and William E. Pelham, Jr., Ph.D.

Introduction ..................................................................................... 7-2
The Rationale for School-Wide Interventions ..................................... 7-3
Children’s Mental Health: A Public Health Crisis .............................. 7-4
  Undertreatment of Children ............................................................ 7-4
  System Goals ............................................................................. 7-5
  Using SWIs to Meet System Goals ................................................... 7-5
Three-Tiered Intervention ................................................. 7-6
  Tier Structures ......................................................... 7-6
  Administering the Least Intrusive Interventions ...................... 7-7
Providing Higher Levels of Intervention ................................ 7-7
  Wait-and-See Approach .............................................. 7-7
  Triage Approach ....................................................... 7-7
    Example: Triple-P Approach ....................................... 7-8
    Service-Level Transitions ......................................... 7-8
Prototypical Programs .................................................... 7-9
  Life Skills Training .................................................. 7-10
  Triple-P Positive Parenting Program ................................ 7-10
  CHP Three-Tiered Math Intervention ................................ 7-11
  Academic and Behavioral Competencies Program ..................... 7-11
Practical Considerations for School-Wide Intervention .............. 7-12
  Importance of Collaborative Consultation ........................ 7-12
  Site Committee Meetings ............................................ 7-12
  Involving Parents ..................................................... 7-13
  Teacher Training ..................................................... 7-14
  School-Wide Rules and Structure .................................. 7-14
    Tracking Mechanisms .............................................. 7-15
    Student Feedback .................................................. 7-15
    School to Home Notes for Good Behavior ......................... 7-15
Reinforcing Positive Behavior .......................................... 7-16
  Public Recognition and Tangible Incentives for Positive Behavior
    ................................................................. 7-16
  Home-to-School Communication ..................................... 7-17
  Time Out ............................................................... 7-17
Additional Training ...................................................... 7-17
  Social Skills Training ............................................... 7-17
  Parent Training ....................................................... 7-18
Fidelity Monitoring ...................................................... 7-18
Conclusion ........................................................................ 7-19

Chapter 8: School-Wide Positive Behavior Support—Preventing the
Development and Occurrence of Problem Behavior

Brandi Simonsen, Ph.D., George Sugai, Ph.D., and Sarah Fairbanks, M.S.

Introduction ............................................................... 8-2
Theoretical Foundations and Legal Basis of SWPBS .................. 8-2
  Theoretical Foundations .............................................. 8-2
  Legal Basis .................................................................. 8-4
Chapter 9: From Programs to Integrated Programming—A Framework for Implementing and Sustaining School-Wide Social and Emotional Learning

Jennifer Axelrod, Ph.D., Elizabeth Devaney, M.A., Kristen Ogren, M.A., Manolya Tanyu, M.A., and Mary Utner O’Brien, Ph.D.

Introduction .................................................. 9-2
   School Level ............................................. 9-3
   Student Level ........................................... 9-3
Implementation and Sustainability: What Does the Research Say? ................................. 9-4
Implementation and Sustainability Framework ......................................................... 9-5
   Leadership ............................................... 9-6
      Principals .......................................... 9-7
      Leadership Team .................................. 9-7
Readiness Phase .............................................. 9-7
      Step 1: Principal Commits to School-Wide SEL Initiative .................................. 9-7
      Step 2: Principal Engages Key Stakeholders and Creates SEL Steering Committee .... 9-7
Planning Phase ................................................ 9-9
      Step 3: Develop and Articulate a Shared Vision ........................................... 9-9
      Step 4: Conduct a School-Wide Needs and Resources Assessment ....................... 9-9
Step 5: Develop an Action Plan for SEL
  Implementation ............................................................. 9-9
Step 6: Review and Select Evidence-Based Program(s)/ Strategies ......................................................... 9-9
Implementation Phase ......................................................... 9-9
Step 7: Conduct Initial Professional Development Activities .......................................................... 9-10
Step 8: Launch SEL Instruction in Classrooms ............................................................. 9-10
Step 9: Expand Classroom-Based SEL Programming and Integrate SEL School-Wide ........................................ 9-10
Step 10: Revisit Implementation Activities and Adjust for Continuous Improvement ..................................... 9-10
Factors for Effectively Sustaining SEL Implementation ................................................................................. 9-10
  Provide Ongoing Professional Development ............................................................. 9-11
  Evaluate Practices and Outcomes for Continuous Improvement ............................................................. 9-11
  Develop an Infrastructure to Support SEL Programming ............................................................. 9-12
  Integrate SEL Framework and Practices School-Wide ............................................................................. 9-12
  Nurture Partnerships With Families and the Community ............................................................. 9-13
  Communicate With All Members of the School Community About SEL Programming ........................................ 9-14
Case Study: One District’s Journey in Implementing and Sustaining SEL ............................................................................... 9-14
  Principal and Stakeholder Commitment ................................................................................................. 9-15
  Needs Assessment ................................................................................................................................. 9-16
  Integration With Strategic Plan ............................................................................................................. 9-16
  Professional Development .................................................................................................................. 9-16
  Program Sustainability ....................................................................................................................... 9-17
Conclusion ........................................................................................................................................... 9-17

Chapter 10: Mental Health Consultation in Secondary Schools
Introduction ........................................................................................................................................ 10-1
Overview of School Consultation ........................................................................................................... 10-2
  The Consultative Relationship ............................................................................................................... 10-2
  Problem-Solving Process ....................................................................................................................... 10-4
Effectiveness of School Consultation ...................................................................................................... 10-5
The Unique Challenges of Secondary Schools ......................................................................................... 10-5
  Developmental Factors ......................................................................................................................... 10-6
  The Emergence of New Risks ............................................................................................................... 10-6
Help-Seeking Behaviors .......................................................................................................................... 10-7
PART 3: EVIDENCE-BASED, PROBLEM-FOCUSED TREATMENT

Chapter 11: School-Based Intervention for Youth Antisocial Behavior—
The Coping Power Program

John E. Lochman, Ph.D., ABPP, Caroline L. Boxmeyer, Ph.D., and
Melissa F. Jackson, Ph.D.

Introduction .......................................................... 11-1
Antisocial Behavior ............................................. 11-2
A Contextual Social–Cognitive Model of Aggressive Behavior .............. 11-2
  Contextual Family Factors .................................. 11-3
  Parenting Practices .......................................... 11-3
  Contextual Peer Factors .................................. 11-4
  Contextual Community and School Factors .......................... 11-4
  Social Information Processing ................................ 11-5
    Appraisal ................................................. 11-5
  Problem Solving ............................................ 11-5

Evidence-Based Prevention and Intervention Programs for
Antisocial Behavior ............................................. 11-6
  Universal Prevention Programs .............................. 11-6
  Targeted Prevention and Intervention Programs .................. 11-6

The Coping Power Program .................................... 11-7
  Child Component ............................................ 11-7
  Parent Component .......................................... 11-9

Coping Power Outcome Research ................................ 11-10
Chapter 12: School-Based Mental Health Treatment of Children and Adolescents With Attention Deficit Hyperactivity Disorder

Steven W. Evans, Ph.D., Casey White, M.A., Maggie Sibley, M.A., and Emily Barlow, B.S.

Introduction ......................................................... 12-2
Interventions for Children in Elementary Schools ........................................ 12-2
  Classroom-Based Behavioral Interventions ........................................... 12-2
  Teacher Behaviors .................................................. 12-3
  Strategies .............................................................. 12-4
    Token Economies .................................................. 12-4
    Daily Report Cards ............................................... 12-4
School-Based Interventions for Social Impairment ...................................... 12-5
  Social Skills Training Model ........................................... 12-6
  Peer Coaching ......................................................... 12-6
  Parent-Focused Interventions ............................................ 12-7
  Summary ............................................................... 12-7
Secondary School-Based Treatment ......................................................... 12-7
  Difficult Transitions; Continuing Problems ....................................... 12-7
  Individualized Education Plans/Accommodations .................................. 12-8
    Note-Taking Training ................................................. 12-9
    Self-Monitoring ..................................................... 12-9
    Functional Assessment ............................................. 12-10
  Consultation Model ................................................... 12-10
The Challenging Horizons Program—An After-School Intervention ................. 12-11
  Academic Interventions .............................................. 12-11
  Disruptive Behavior Interventions ........................................ 12-12
  Social Functioning Interventions ....................................... 12-13
  Parent and Teacher Liaison ........................................... 12-14
  Integrated and After-School Model ......................................... 12-14
Future Directions .......................................................... 12-15

Chapter 13: Approaches to Measuring, Preventing, and Decreasing Bullying and Victimization in Schools

Cynthia M. Hartung, Ph.D., and Douglas J. Scambler, Ph.D.

Introduction .......................................................... 13-1
Definitions of Bullying and Victimization .............................................. 13-3
Bullying Behaviors ................................................................. 13-3
Relational Aggression ............................................................. 13-4
Bullying Roles and Bystanders .................................................... 13-4
Measuring the Frequency and Severity of Bullying and Victimization .......... 13-6
Assessment Instruments ........................................................... 13-6
Use of Video Recording ............................................................ 13-6
Student Self-Report Measures ..................................................... 13-6
Measuring the Playground and Lunchroom Climate ................................ 13-7
Measurement Studies ............................................................... 13-7
Recommendations ...................................................................... 13-8
Evidenced-Based Bullying Prevention Programs ..................................... 13-9
Bergen Anti-Bullying Program ....................................................... 13-9
Outcome Studies ...................................................................... 13-10
Original Bergen Program ........................................................... 13-10
Program Replications and Partial Replications .................................... 13-11
Other Programs and Their Outcomes ............................................. 13-13
Belgium .................................................................................... 13-13
Spain ...................................................................................... 13-14
Canada .................................................................................... 13-14
More Recent Anti-Bullying Initiatives ............................................. 13-15
Addressing Mixed Results ........................................................... 13-16
Future Directions ...................................................................... 13-17

Chapter 14: Childhood Obesity—The Consequences and the Role of Schools
Judith A. Flohr, Ph.D. and Jacqueline A. Williams, Ed.D.
Introduction ............................................................................. 14-1
Definition of Childhood Overweight and Obesity ................................. 14-2
Prevalence of Childhood Obesity ................................................... 14-3
Consequences of Obesity and Overweight in Children ....................... 14-3
  Impacts on Physical Health ...................................................... 14-4
    Increased Lifetime Risk of Morbidity ....................................... 14-4
    Risk Factors for Cardiovascular Disease ................................ 14-5
    Metabolic Syndrome .......................................................... 14-5
    Type II Diabetes ................................................................... 14-5
  Impacts on Psychosocial Functioning ........................................... 14-6
    Self-Esteem ......................................................................... 14-6
    Body Image ........................................................................ 14-7
    Depression .......................................................................... 14-8
    Bullying and Teasing .......................................................... 14-9
Practice Implications ........................................ 14-9
Impacts on Academic Performance .......................... 14-10
Role of Public Schools in Reducing the Incidence and Severity of
Overweight In Children .................................. 14-10
Review of School-Based Interventions ...................... 14-10
Practice Implications ...................................... 14-12

Chapter 15: School-Based Interventions for Anxiety Disorders in Children
and Youth
*Lara Farrell, Ph.D., Paula Barrett, Ph.D., and Thomas Ollendick, Ph.D.*
Prevalence of Anxiety Disorders ............................ 15-1
Concurrent Psychosocial Difficulties ......................... 15-2
Cognitive–Behavioral Intervention for Anxiety Disorders .... 15-2
  Effectiveness ............................................ 15-2
  Barriers to Treatment .................................. 15-3
Prevention Approaches in Schools ........................... 15-4
  Three Types of Programs ................................ 15-4
    Selective ............................................. 15-4
    Indicated ............................................ 15-4
    Universal ............................................ 15-5
  Practical Considerations in Program Choice ............... 15-5
The Evidence—Outcomes Achieved With Various School-Based
Prevention Programs ........................................ 15-7
  Indicated Interventions ................................ 15-7
  Selective Interventions ................................ 15-10
  Universal Interventions ................................ 15-11
Conclusion .................................................... 15-14

Chapter 16: School-Based Interventions for Child Traumatic Stress
*Lisa H. Jaycox, Ph.D., Bradley D. Stein, M.D., Ph.D., Lisa Amaya-Jackson, M.D.,
and Lindsey K. Morse, B.A.*
Rationale for School-Based Intervention ...................... 16-1
Models for Implementing Trauma-Focused Mental Health Programs .... 16-3
  Recovery in the Immediate Aftermath of a Traumatic Event .... 16-3
    Crisis Intervention .................................... 16-4
    Psychological First Aid ................................. 16-4
Intermediate and Long-Term Mental Health Recovery From
Trauma-Related Problems ................................... 16-4
  Programs Addressing Trauma of Many Types ................ 16-5
  Programs Addressing Disasters and Terrorism ................ 16-8
  Programs Addressing Loss ................................ 16-12

**PART 4: KEY ISSUES IN SCHOOL-BASED MENTAL HEALTH**

**Chapter 18: Schools’ Provision of Information Regarding Mental Health and Associated Services to Culturally Diverse Families**

Zewelanji N. Serpell, Ph.D., Caroline S. Clauss-Ehlers, Ph.D., and Michael A. Lindsey, Ph.D.

Defining the Problem                                                                                | 18-2 |
| Diverse Families’ Lack of Knowledge and Access to Information in Schools                        | 18-2 |
| Knowledge as a Predictor of Whether Culturally Diverse Families Get Access to Needed Mental Health Services | 18-3 |
| Challenges in Providing Information to Culturally Diverse Families                             | 18-4 |

Constraints Imposed by School and Community Systems and Implications for Rethinking the Role of Schools  | 18-5 |
| Barriers Associated With Schools, Particularly Teachers as Information Providers                | 18-5 |
| The Challenge to Teachers                                                                      | 18-6 |

Chapter 19: Issues in Evidence-Based Practice in Special Education for Children With Emotional or Behavioral Disorders

Elizabeth Buvinger, B.A., Steven W. Evans, Ph.D., and Steven R. Forness, Ed.D.

Introduction ........................................... 19-1
Evidence ................................................. 19-2
  Research Standards .................................. 19-2
  Criteria for Evidence-Based Practice ............. 19-3
Sustaining Evidence-Based Practice ................ 19-4
  Phases of Evidence-Based Practices ............... 19-5
  Exemplars of Sustainability in Special Education 19-6
    Positive Behavioral Intervention and Support 19-6
    Functional Behavior Analysis ................... 19-6
Differential Diagnoses ................................ 19-7
School Mental Health .................................. 19-9
  Three-Tiered Model .................................. 19-9
  Implementation/Service Delivery .................. 19-9
  Issues Regarding Secondary Prevention .......... 19-10
  Need for a Common Language ..................... 19-11
  Preschool Prevention .............................. 19-12
Conclusion ............................................. 19-13

Chapter 20: Maintaining Program Fidelity After the Thrill—and External Support—Is Gone

Susan S. Han, Ph.D., and Bahr Weiss, Ph.D.

Introduction ........................................... 20-1
Factors Related to Program Implementation by Teachers 20-3
  Administrative Support by the School Principal 20-4
# Table of Contents

- Teacher Self-Efficacy Beliefs ........................................... 20-4
- Professional Burnout ...................................................... 20-5
- Program Acceptability and Preimplementation Attributions
  - About the Program ........................................... 20-5
  - Teacher Training ........................................... 20-7
  - Performance Feedback ........................................... 20-7
- Ingredients of a Sustainable School-Based Program ............... 20-8
  - Acceptability to Teachers ........................................... 20-8
  - Program Effectiveness ........................................... 20-8
  - Feasibility of Ongoing Implementation, With Minimal But Sufficient Resources ............. 20-9
  - Flexibility and Adaptability ........................................... 20-10
- Process Model of Enhanced Sustainability .......................... 20-10
  - Preimplementation Phase ........................................... 20-12
  - Supported Implementation Phase ........................................... 20-12
    - Improving Teacher Implementation Skills ............. 20-13
    - Teacher Motivation ........................................... 20-13
  - Sustainability Phase ........................................... 20-13
- Conclusion ................................................................. 20-14

## Chapter 21: Teacher Engagement in Expanded School Mental Health

*Robert W. Burke, Ph.D. and Carl E. Paternite, Ph.D.*

- Introduction ................................................................. 21-1
- Overview and Rationale .................................................. 21-2
  - Expanded Mental Health Program Development ............. 21-2
  - Need for Teacher Engagement and Teacher–Mental Health Professional Collaboration ............. 21-3
- Chronic Tension Between Education and Mental Health Systems ............. 21-4
- Understanding Teachers and Their Work ........................................... 21-5
  - Motivation to Teach ........................................... 21-5

Chapter 22: The Role of International Organizations to Promote School-Based Mental Health
Siobhan Murphy, M.H.S.A., Elizabeth Moore, M.S., and Mark D. Weist, Ph.D.

Introduction ................................................................. 22-1
International Movements Advancing the Link Between Education and Health .............................................. 22-2
The Complex Challenges of Documenting Child and Adolescent Mental Health ............................................. 22-4
Future Trends Affecting Child and Adolescent Mental Health ................................................................. 22-5
International Data on Policy, Training, Services, and Resources .............................................................. 22-7
International Organizations and Alliances Responding to the Challenge ..................................................... 22-9
Intercamhs ................................................................. 22-9
International Association for Child and Adolescent Psychiatry ............................................................ 22-13
World Federation for Mental Health ......................................................... 22-13
Association for Child and Adolescent Mental Health ................................................................. 22-13
World Association for Infant Mental Health ......................................................... 22-14
Conclusion ................................................................. 22-14

PART 5: FUTURE DIRECTIONS

Chapter 23: Thoughts on Future Directions for School-Based Intervention Research
Nicholas S. Ialongo, Ph.D.

Introduction ................................................................. 23-1
Design and Analysis of Preventive Intervention Trials ................................................................. 23-1
Cost-Benefit Analysis ................................................................. 23-1
Data Analysis of Treatment Intervention Trials ................................................................. 23-2
Intent-to-Treat Analysis ................................................................. 23-2
Analysis of Encouragement Designs ................................................................. 23-2
Data Collection Methods ................................................................. 23-4
Need for Effectiveness as Well as Efficacy Trials ................................................................. 23-5
Organizational Factors and Conceptual Models ................................................................. 23-6
Conclusion ................................................................. 23-8

Chapter 24: School-Based Mental Health Services—Meeting the Challenge, Realizing the Potential
Albert J. Duchnowski, Ph.D. and Krista Kutash, Ph.D.

Introduction ................................................................. 24-1
TABLE OF CONTENTS

Financial Issues .................................................. 24-2
Federal Policies .................................................. 24-3
